Trichy, Tamil Nadu - 620006, India

PROFILE SUMMARY

Motivated MCA student with hands-on experience in Python, Machine Learning, NLP, FastAPI, and Data Analytics. Skilled in developing AI-powered applications, prediction systems, and responsive web solutions using modern frameworks and deployment tools..

EDUCATION

- MCA** June/2024 - Present
Bishop heber College(Autonomous)
GPA: 9.22/10.00
Tiruchirappalli, India
- BCA** June/2021 - April/2024
Seethalakshmi Ramaswami College (Autonomous)
GPA: 9.00/10.00
Tiruchirappalli, India
- 12th-HSC** June/2019-April/2021
Savitri Vidyasala Hindu Girls Hr Sec School
Percentage: 77.82%
Tiruchirappalli, India

SKILLS

- Languages:** Python, Java, HTML, CSS, JavaScript
- ML / AI:** Scikit-learn, OpenCV, Pandas, NumPy, NLP, NLTK
- Frameworks:** FastAPI, Django, Flask, Streamlit
- Databases:** MySQL, MongoDB, SQLite
- Visualization:** Power BI, Tableau, Matplotlib, Seaborn
- Cloud & Deployment:** Docker, Railway, Render, GitHub
- Tools & Platforms:** Git, Postman, Jupyter Notebook, VS Code, MS Excel, Canva, n8n
- Other Tools & Technologies:** Adobe Photoshop, ChatGPT
- Soft Skills:** Communication, Problem Solving, Adaptability, Self-Learning, Team Collaboration.

CERTIFICATIONS

- Data Science and Machine Learning — Root IT Learning Center, Trichy**
- Python Programming — Coursera**
- Basics of Artificial Intelligence and Machine Learning — Infypro**
- Diploma in Information Technology — INFOSCHOOL, Tiruchirappalli**
- Workshop on Data Visualization Tools — Bishop Heber College**

INTERNSHIP

- Python & Django, Gateway Software Solutions.** May/2025 - June/2025
 - Developed backend modules using Python and Django, contributing to a functional web application within a 1-month timeline
 - Designed and queried relational databases using SQL, implementing CRUD operations for application data management
 - Built and styled frontend pages with HTML and CSS, integrating them with Django templates for dynamic content rendering
- Python, Greensoft Groups.** May/2024 - June/2024
 - Processed and cleaned real-world datasets of 10,000+ records using Pandas and NumPy, improving data consistency for downstream analysis
 - Performed exploratory data analysis (EDA) to identify trends and outliers, summarizing findings in structured reports
 - Automated repetitive data formatting tasks using Python scripts, reducing manual effort by an estimated 60%

MAIN PROJECTS

- AI Based Automated Attendance Tracking System**
Developed an AI-based system to automate attendance tracking using face recognition technology. The system detects and identifies individuals in real time and records attendance securely in a database, reducing manual effort and improving accuracy.
Tech Stack: Python, OpenCV, Machine Learning, Streamlit, SQLite
- AI Based Fake Job Posting Detection System**
Developed an AI-powered application to detect fraudulent job postings using Natural Language Processing and Machine Learning techniques. The system analyzes job descriptions and predicts whether a job posting is real or fake, helping users avoid online recruitment scams.
Tech Stack: Python, FastAPI, Scikit-learn, NLP, HTML, CSS, Docker, SQLite
- Car Price Prediction System**
Developed a machine learning-based application to predict used car prices based on various vehicle attributes such as brand, fuel type, mileage, and manufacturing year. The system helps users estimate accurate resale values through predictive analytics.
Tech Stack: Python, FastAPI, Pandas, Scikit-learn, HTML, CSS, SQLite
- Enterprise AI Readiness Analyzer**
Developed a web-based AI readiness assessment system to evaluate organizational preparedness for AI adoption and identify potential security and governance risks. The system generates risk scores and provides recommendations for AI implementation strategies.
Tech Stack: Python, FastAPI, JavaScript, HTML, CSS, SQLite
- AI Chatbot Using NLP**
Developed an intelligent chatbot capable of responding to user queries using Natural Language Processing techniques. The chatbot improves interaction through intent recognition and automated conversational responses.
Tech Stack: Python, Flask, NLP, NLTK, HTML, CSS, SQLite

RESEARCH

"An Integrated AI-Assisted Framework for Real-Time Attendance Tracking and Behavioral Analysis"

- Achieved 98.2% recognition accuracy using a hybrid HOG + deep embedding face recognition pipeline
- Optimized for CPU-based real-time inference at 4–6 FPS without GPU dependency
- Validated system performance using precision, recall, and F1-score metrics

ACHIEVEMENTS

- University Rank Holder and Recognized as an Academic Topper for consistent academic performance.**
- Developed and deployed multiple AI/ML web applications using FastAPI and Docker.**
- Built NLP and prediction-based systems focused on real-world problem solving.**
